Cuddle Baby Cables Blanket

Notes

This is not the best pattern to use for your first cables project as the descriptions are brief and assume you already generally know how to work cables. All cable stitches are worked into the fpdc stitches beneath the previous row (you will skip the the stitches in the row of SC worked between each of the cable stitch rows). When working the cables make sure to keep a loose tension to keep the blanket from bunching up.

Although it is only noted in the first two rows, each row has 110 stitches.

There is no border included in this pattern but I would suggest something simple like reverse SC if you wish to add one. My blanket was 30"x32" before adding a border.
